

LEICA DISTO D330

With a measuring accuracy of $\pm 1/16$ inch (± 1.0 mm), the Leica DISTO™ D330 offers high precision at the touch of a button. The large, illuminated display shows the measurement results and supplementary information clearly and legibly.

- Smart Horizontal Mode™
- Inclination measurement ($\pm 45^\circ$)
- Illuminated 4-line display
- Multifunctional end-piece
- Robust with IP 54
- Power Range Technology™

Package includes: holster, hand loop, 2 AAA batteries, CD with manual / safety instructions, Producer certificate M in accordance with DIN 55350-18-4.2.2, Quickstart guide.

Features	Your advantages
Measuring range 2.0 inch to 325 feet (0.05 to 100 m) Typ. accuracy $\pm 1/16$ inch (± 1.0 mm)	Precise, quick and reliable measurements
Smart Horizontal Mode™	Determine precise horizontal distances at the press of a key
Tilt sensor	Measure angles up to $\pm 45^\circ$ at the touch of a button
Flip-out end-piece with automatic detection	Reliable, trouble-free and error-free measurement from edges or out of corners
Pythagoras functions	Indirect height and width measurements in inaccessible positions
Room dimensions	Values such as total wall length, wall and ceiling area are available at the touch of a button
Stake out function	Stake out equal or two different recurring distances
Triangle function	Determine the area of a many-cornered room efficiently
